

DAY 8 — LAB 8

Workplace Writing II: Summary Fidelity and Report Scaffolding

Source Passage

Passenger-Service Report

During August, an airport customer-service team reviewed 120 passenger comments. Forty-five comments concerned long queues at security screening, 30 concerned unclear directional signs, 20 concerned baggage delays, 15 concerned limited seating near departure gates and 10 praised staff helpfulness.

The report did not measure overall passenger satisfaction. It did not compare the airport with other airports. No financial impact was calculated. Airport management introduced two temporary details desks near the security area for a two-week trial. The effect of this trial had not been measured when the report was prepared.

Prompt Used

Summarise the supplied airport passenger-service report in no more than 100 words. Retain all important figures, clearly distinguish complaints from positive feedback and do not add recommendations, comparisons, financial information or conclusions that are not stated in the source.

Initial AI Summary

During August, an airport customer-service team reviewed 120 passenger comments. The main complaints were long security queues (45), unclear directional signs (30), baggage delays (20), and limited seating near departure gates (15). Ten comments praised staff helpfulness. Airport management introduced two temporary information desks near security for a two-week trial. The report did not measure overall passenger satisfaction, compare the airport with other airports, or calculate financial impact. The effect of the information desks had not yet been measured.

Word count: 77 words

Claim-by-Claim Fidelity Check

Claim in AI Summary	Present in Source?	Support	Correction Required
The team reviewed 120 passenger comments.	Yes	Fully Supported	No correction required.
45 comments concerned long security queues.	Yes	Fully Supported	No correction required.
30 comments concerned unclear directional signs.	Yes	Fully Supported	No correction required.
20 comments concerned baggage delays.	Yes	Fully Supported	No correction required.
15 comments concerned limited seating.	Yes	Fully Supported	No correction required.
10 comments praised staff helpfulness.	Yes	Fully Supported	No correction required.
Two temporary information desks were introduced.	Yes	Fully Supported	No correction required.
The desks were introduced near security.	Yes	Fully Supported	No correction required.
The trial lasted two weeks.	Yes	Fully Supported	No correction required.
Overall passenger satisfaction was not measured.	Yes	Fully Supported	No correction required.
The airport was not compared with other airports.	Yes	Fully Supported	No correction required.
No financial impact was calculated.	Yes	Fully Supported	No correction required.
The effect of the information desks had not been measured.	Yes	Fully Supported	No correction required.

Finding

The first summary remains closely aligned with the source. It retains the key numerical details and the major limitations without adding unsupported recommendations or conclusions.

Numerical Information Check

Information	Original Source	AI Summary	Match?
Total passenger comments	120	120	Yes

Information	Original Source	AI Summary	Match?
Security-queue complaints	45	45	Yes
Directional-sign complaints	30	30	Yes
Baggage-delay complaints	20	20	Yes
Seating complaints	15	15	Yes
Positive staff comments	10	10	Yes
Number of temporary information desks	2	2	Yes
Trial duration	2 weeks	2 weeks	Yes

Omissions and Inventions

Issue	Omission, Distortion or Invention?	Evidence	Required Correction
Total number of comments	None	The summary states 120 comments.	No correction required.
Complaint categories and figures	None	All four complaint categories and figures are included.	No correction required.
Positive staff feedback	None	The summary includes 10 positive comments.	No correction required.
Information-desk trial outcome	None	The summary clearly states that its effect had not been measured.	No correction required.
Overall satisfaction	None	The summary correctly states that it was not measured.	No correction required.
Financial impact	None	The summary states that no financial impact was calculated.	No correction required.
Comparison with other airports	None	The summary states that no comparison was made.	No correction required.
Unsupported recommendation	None	No recommendation has been added.	No correction required.

Overall Assessment

No material omissions, distortions or inventions were identified in the initial summary.

Corrected Summary

Since the initial summary already accurately represented the source, only a minor wording refinement is needed.

During August, an airport customer-service team reviewed 120 passenger comments. Complaints included long security queues (45), unclear directional signs (30), baggage delays (20), and limited seating near departure gates (15). Ten comments praised staff helpfulness. Management introduced two temporary information desks near security for a two-week trial. The report did not measure overall passenger satisfaction, compare the airport with other airports, or calculate financial impact. The effect of the information desks had not been measured when the report was prepared.

Initial vs Corrected Comparison

Evaluation Criterion	Initial Summary	Corrected Summary
All important figures retained	Yes	Yes
Positive feedback retained	Yes	Yes
No invented information	Yes	Yes
Limitations stated	Yes	Yes
Meaning of source preserved	Yes	Yes
Suitable for management review	Yes	Yes

Student Conclusion

The initial summary performed well as it retained the major complaint categories, all key figures and the positive feedback. It additionally correctly included the limitations of the source, including the fact that passenger satisfaction and financial impact were not measured. No unsupported details or invented statistics were identified. The corrected version primarily improves the wording while maintaining the same factual content. The corrected summary is reliable because it remains closely connected to the original source and does not present assumptions or unmeasured outcomes as facts.

Management-Report Scaffold

1. Title

Airport Passenger-Service Review — August

2. Executive Summary

The airport customer-service team reviewed **120 passenger comments** during August. The comments covered security queues, directional signs, baggage delays, seating near departure gates and staff helpfulness.

3. Purpose of the Report

The purpose of this report is to present the passenger-service comments reviewed during August and identify the main categories of feedback.

4. Source and Scope

The report is based on **120 passenger comments** reviewed by the airport customer-service team during August.

[VERIFY — CONFIRM SOURCE DATE AND REPORT VERSION]

5. Key Findings

- 45 comments concerned long queues at security screening.
- 30 concerned unclear directional signs.
- 20 concerned baggage delays.
- 15 concerned limited seating near departure gates.
- 10 comments praised staff helpfulness.

6. Complaint Categories

Category	Number of Comments
Security queues	45
Directional signs	30
Baggage delays	20
Limited seating	15

7. Positive Feedback

Ten comments praised staff helpfulness.

8. Actions Already Taken

Airport management introduced two temporary details desks near the security area for a two-week trial.

9. Limitations

The source did not measure overall passenger satisfaction. It did not compare the airport with other airports, and no financial impact was calculated.

The effect of the details-desk trial had not been measured when the report was prepared.

10. Recommendations

[VERIFY — MANAGEMENT INPUT REQUIRED BEFORE ADDING RECOMMENDATIONS]

Any recommendation should be based on verified evidence and, where suitable, evaluation of the details-desk trial.

11. Information Requiring Verification

- Passenger satisfaction score: [VERIFY — NOT MEASURED IN SOURCE]
- Financial impact: [VERIFY WITH FINANCE DEPARTMENT]
- Outcome of information-desk trial: [VERIFY AFTER TRIAL EVALUATION]
- Comparison with previous periods: [VERIFY WITH PREVIOUS REPORT]
- Staffing levels during security peaks: [VERIFY WITH OPERATIONS]

12. Conclusion

The available source identifies several passenger-service complaint categories and records positive feedback regarding staff helpfulness. However, additional details is needed before conclusions can be made about passenger satisfaction, financial impact or the effectiveness of the temporary information desks.

Verification Placeholder Activity

Report Section	Information Required	Available in Source?	Verification Placeholder
Executive Summary	120 comments and complaint categories	Yes	Not required for existing facts
Key Findings	Complaint figures	Yes	Not required
Actions Taken	Two desks, two-week trial	Yes	Not required for stated action
Recommendations	Evidence-based management recommendations	No	[VERIFY – MANAGEMENT INPUT REQUIRED]
Financial Impact	Financial effect of complaints/actions	No	[VERIFY WITH FINANCE DEPARTMENT]

Report Section	Information Required	Available in Source?	Verification Placeholder
Trial Outcome	Effectiveness of information desks	No	[VERIFY AFTER TRIAL EVALUATION]
Conclusion	Evidence-based overall conclusion	Partly	[VERIFY – ADDITIONAL EVIDENCE REQUIRED]

Structure vs Facts Activity

Item	Classification	Reason
The report reviewed 120 comments	Verified source fact	Directly stated in the source.
Executive Summary	Report structure	It is a section heading, not a factual claim.
Passenger satisfaction has declined	Interpretation	The source did not measure overall satisfaction.
Install more directional signs	Recommendation	It proposes an action that is not stated in the source.
Two temporary information desks were introduced	Verified source fact	Directly stated in the source.
The trial was successful	Information requiring verification	The source says its effect had not been measured.
Financial Impact	Report structure	It is a possible report section.
[VERIFY AFTER TRIAL EVALUATION]	Information requiring verification	It indicates that evidence is needed before making a conclusion.

Step 12 — Second Summary-Fidelity Activity

Source Passage

An airline reviewed 80 baggage-related complaints received during one month. Thirty-two complaints concerned delayed baggage, 18 concerned damaged baggage, 14 concerned difficulty obtaining tracking details, 10 concerned communication from service staff and six concerned baggage-delivery arrangements.

The document did not state that any baggage was permanently lost. It did not report compensation amounts, delivery timelines or customer-satisfaction scores. The airline planned to review its baggage-tracking communication, but no new system had been approved.

Prompt Used

Summarise the supplied baggage-complaint report in 80–100 words. Retain the complaint categories and figures. Do not describe delayed baggage as lost baggage. Do not invent compensation, delivery timelines, satisfaction scores or approved solutions.

Initial AI Summary

An airline reviewed 80 baggage-related complaints during one month. The complaints included delayed baggage (32), damaged baggage (18), difficulty obtaining tracking details (14), communication from service staff (10), and baggage-delivery arrangements (6). The document did not state that baggage was permanently lost and did not provide compensation amounts, delivery timelines or customer-satisfaction scores. The airline planned to review its baggage-tracking communication, but no new system had been approved.

Numerical Fidelity Check

Category	Source	AI Summary	Match?
Total complaints	80	80	Yes
Delayed baggage	32	32	Yes
Damaged baggage	18	18	Yes
Tracking-information difficulty	14	14	Yes
Staff communication	10	10	Yes
Delivery arrangements	6	6	Yes

Omissions

The initial summary retains all major details. No key numerical category was omitted.

Inventions

No invented compensation, delivery timelines, satisfaction scores or approved solutions were included.

It also correctly avoids describing delayed baggage as permanently lost.

Corrected Baggage Summary

An airline reviewed 80 baggage-related complaints during one month. The complaints involved delayed baggage (32), damaged baggage (18), difficulty obtaining tracking details (14), communication from service staff (10), and baggage-delivery arrangements (6). The document did not report permanently lost baggage, compensation amounts, delivery timelines or customer-satisfaction scores. The airline planned to review its baggage-tracking communication, but no new system had been approved. Any information about compensation, delivery timelines, satisfaction or a new tracking system would require [VERIFY] evidence before inclusion in a management report.

My Summary Activity

Selected Source

Airport Passenger-Service Report

Structured Prompt

Summarise the supplied airport passenger-service report for airport management. Keep the response between 80 and 100 words. Retain the total number of passenger comments, each complaint category and its figure, positive staff feedback, actions already taken and important source limitations. Do not add recommendations, financial figures, comparisons with other airports or conclusions that are not supported by the source. Clearly identify unavailable information using [VERIFY]. Present the answer as a concise management summary.

Generated Summary

During August, an airport customer-service team reviewed 120 passenger comments. The comments included 45 concerning long security queues, 30 concerning unclear directional signs, 20 concerning baggage delays and 15 concerning limited seating near departure gates. Ten comments praised staff helpfulness. Management introduced two temporary information desks near security for a two-week trial. Overall passenger satisfaction was not measured, no financial impact was calculated and no comparison with other airports was made. The effect of the information-desk trial had not been measured when the report was prepared.

Verification Process

The summary was checked against the original source by:

1. Checking the total number of comments.
 2. Checking every complaint category.
 3. Checking every numerical figure.
 4. Checking the positive feedback.
 5. Checking the information-desk action and trial duration.
 6. Checking source limitations.
 7. Checking for unsupported recommendations or conclusions.
 8. Confirming that no financial or comparative information was invented.
-

Peer Review

Sample completion — replace this with actual peer feedback if required.

Review Question	Yes/No	Evidence or Suggested Correction
Does the summary preserve the source meaning?	Yes	The main facts and limitations are retained.
Are all important figures correct?	Yes	All figures match the source.
Has any critical information been omitted?	No	Complaint categories, positive feedback and limitations are included.
Has any unsupported information been added?	No	No unsupported recommendations or statistics were added.
Are source limitations included?	Yes	Satisfaction, comparison and financial limitations are stated.
Are [VERIFY] placeholders used correctly?	Yes	They are used for information unavailable from the source.
Is the summary concise and readable?	Yes	It stays within the requested word limit.
Is the summary suitable for the intended audience?	Yes	It uses clear management-oriented language.

Final Changes After Peer Review

The summary was reviewed for numerical accuracy, source fidelity and clarity. The wording was refined to make the limitations of the source clearer. No unsupported facts or recommendations were added.

My Reflection

1. What does summary fidelity mean?

Summary fidelity means keeping the meaning and key details of the original source while making the content shorter. A faithful summary should not add facts, change meanings or invent information.

2. What is the difference between an omission and an invention?

An omission occurs when details from the source is left out of the summary. An invention occurs when the AI adds information that does not exist in the source.

3. Why must numerical information be checked separately?

Numbers can easily be changed or misunderstood by AI. Checking figures separately helps ensure that the summary does not contain incorrect statistics or altered quantities.

4. Why should source limitations be included in a summary?

Source limitations demonstrate what the report does and does not prove. Including them prevents readers from treating unavailable details as established facts.

5. What is a report scaffold?

A report scaffold is the basic structure of a report. It contains headings and sections that organise the details before the complete report is prepared.

6. Why should report structure be separated from factual content?

Structure tells us where details belongs, while facts tell us what is actually known. Separating them prevents assumptions from being presented as verified information.

7. What is the purpose of a [VERIFY] placeholder?

A [VERIFY] placeholder identifies details that needs confirmation before the report is finalised. It prevents AI from filling gaps with invented facts.

8. Can a concise summary still be misleading? Explain.

Yes. A summary can be short and easy to read but still be misleading if it removes key limitations, changes figures or adds unsupported conclusions. Conciseness should not come at the cost of accuracy.

9. How did peer review improve your summary?

Peer review provided another perspective on the summary. It helped check whether the figures were correct, whether key details had been omitted and whether the wording was straightforward for the intended audience.

10. Why should an AI-generated management report be reviewed before use?

AI can misunderstand details, omit key details or generate unsupported statements. Human review is therefore necessary to verify facts, figures, context and recommendations before a management report is used.

AI Usage Declaration

ChatGPT and/or Google Gemini were used to generate initial summaries and report structures. I independently checked the source, verified figures, identified omissions and unsupported details, revised the outputs and completed the reflection.
